### **JONESBORO POLICE IDENTIFY POTENTIAL LOCATION FOR RANGE**

The Jonesboro Police Department has identified a potential site on which to develop an outdoor sports range to be used by law enforcement and the public.

The city has reached a preliminary agreement to purchase the property, pending environmental and other studies on the 300-acre site off Moore Road.

The police department seeks to develop a shooting range that can be used for police firearms training as well as for members of the public to use. Additionally, the site is expected to accommodate a trap and skeet range, an archery range and a fishing lake for public use. Plans include the construction of a training and education classroom.

The city and the Arkansas Game and Fish Commission are discussing a partnership for developing and operating the facility.

The police department hopes to have the facility completed by the end of 2017.
