City and county continue flood recovery

NOTE: Please find enclosed a pdf of a Jonesboro map that marks areas we have confirmed flood damage. The city asks that anyone who sustained damage in areas not highlighted on this map to contact the engineering department at 870-932-1052.

The city current estimates that 75 properties have reported flood damage. That number is expected to increase. Residents are encouraged to send damage estimates to assist in proving need of state and federal assistance. Even those who are covered by insurance should report losses because deductibles can be declared.

The city asks that anyone who sustained property damage please contact the city streets department at 870-932-0660 or by email at ctrego@jonesboro.org. They also should email photos and estimates of damage costs, if available, to the above address and Craighead County Emergency Management Director David Moore at dmoore@craigheadcounty.org.

Mayor Harold Perrin spent Thursday afternoon visiting residents in several flooded areas, including the Fairview neighborhood that sustained considerable damage.

“We are working to help our residents who have suffered tremendous loss, and my heart goes out to them,” Perrin said. “But more than that, we are working diligently to find all avenues of financial assistance for them that we can.”
